PROFESSIONAL SUMMARY

2nd year AI/ML student with hand-on experience building generative AI applications. Adapt at leveraging modern APIs and Python workflow to solve practical problems.

EDUCATION

Bhrama Shakti Modern school
PCM

Rohini, Delhi
May 2025

Babu Banarsi Das Institute of technology
Bachelor's of Technology in AI/ML

Duhai, Ghaziabad
2025-2029

EXPERIENCE

Freelance Video Editor

March 2025 – Present

- Elevated video storytelling by blending raw client footage with custom-prompted AI imagery generated via Google Gemini, creating a highly engaging and visually unique final product
- Produced highly engaging informational content by cutting down raw footage and adding motion graphics
- Edited and delivered 35 high-quality videos using CapCut, incorporating dynamic transitions, color grading, and audio mixing to enhance production value.

PROJECTS

AI career catalyst | *Python, Streamlit, Google AI studio,*

March 2026

- * Built a Streamlit-based AI dashboard designed to optimize the standard 6-second resume review process for hiring managers.
- * Developed a bulk upload feature allowing recruiters to process multiple resumes simultaneously and view an instant ranking leaderboard
- * Integrated Plotly data visualizations to display "Match Gauges" and overall hiring chances instead of relying on heavy text blocks.
- * Processed complex, multi-column PDF layouts into clean text using pdfplumber to ensure accurate AI analysis.
- * Trained a Google Gemini 2.5 Flash model to provide raw, factual 1-to-10 scoring metrics while eliminating model hallucinations.

My Social saver | *Flash Api, Python, Uvicorn, Twilio,*

Feb 2026

- * Architected a multimodal data capture tool utilizing the Twilio API to receive unstructured data (links, videos, images, voice notes) via WhatsApp webhooks.
- * Deployed and served the application interface using Uvicorn, ensuring reliable, asynchronous handling of concurrent API requests.
- * Integrated the Gemini 2.5 Flash API to parse raw inputs, automating the extraction of metadata to assign searchable titles, tags, and summaries.
- * Built a sleek "Glassmorphism" user interface to display the AI-processed media in a structured, easily navigable digital vault.

TECHNICAL SKILLS

Languages: Python, C/C++, HTML/CSS,

Developer Tools: Google Cloud Platform, VS Code, Visual Studio, PyCharm, google AI studio, Uvicorn, Twilio

Libraries: pandas, NumPy, PDFplumber, Plotly
